Date: 11.08.2008

Mr Viergever worked for the European Patent Office in charge of the Project Management Office (PMO) from August 2006 to May 2008. During this time he provided strong leadership for the introduction of PRINCE2 to the organisation, demonstrated a very successful style of teaching and provided coaching to those he had educated. The maturity of adoption of PRINCE2 rose under the period of Mr. Viergever's stewardship of the PMO and we have now achieved a sound basis for reproducible project management rather than the somewhat ad-hoc approach of earlier years.

Nico is a very experienced consultant with a long history in the industry and a talent to make people think and reflect, these are essential criteria for any successful introduction of a PMO and associated methodology into a company or organisation. Without his input we would not have achieved our present level of maturity.
