

# PRINCE2® processes during a Stage

The following diagram shows the sub processes used during a PRINCE2® management stage. Although created in 2007 and based on the 2005 version of PRINCE2®, the diagram is still current apart from some changed terminology.

The management stages are supported by three processes *Controlling a Stage* (CS), *Managing Product Delivery* (MP), *Managing a Stage Boundary* (SB), *Closing a Project* (CP) and most parts of *Directing a Project* (DP).

The codes used for the sub processes (CS1, CS2, CS9, etc.) are no longer used in the 2009 version of PRINCE2® but are still included in the diagram for clarification and the relationship with previous versions.

The diagram should clarify the theory and can be used while preparing for the Practitioner exam.
